VOLUME CONTENTS

Volume 55 (1988)

PHYSIOLOGY AND BIOCHEMISTRY

Far-red stimulated long-lived luminescence from barley protoplasts
by H. Nakamoto. L.-G. Sundbland, P. Gardeström and E. Sundbom (Umeå, Sweden) 1–7

Xenobiotic metabolism in higher plants. Involvement of microsomal cytochrome *P*-450 in aminopyrine N-demethylation
by R. Fonne-Pfister, A. Simon, J.-P. Salaun and F. Durst (Strasbourg, France) 9–20

Analysis and biosynthesis of diacylglyceryl-*N,N,N*-trimethylhomoserine in the cells of *Marchantia* in suspension culture
by N. Sato and K. Kato (Tokyo and Osaka, Japan) 21–25

GENETICS AND MOLECULAR BIOLOGY

Recombination in *Escherichia coli* between cloned ribosomal RNA intergenic spacers from *Vicia faba*: a model for the generation of ribosomal RNA gene heterogeneity in plants
by S.O. Rogers and A.J. Bendich (Seattle, WA) 27–31

Species specificity of mitochondrial DNA flanking the 18S rRNA gene in two species of Cucurbitaceae
by P. Toothman, S.O. Rogers, K. Stuart and A.J. Bendich (Seattle, WA) 33–42

Organisation and properties of repeated DNA sequences in rice genome
by M.S. Dhar, M.M. Dabak, V.S. Gupta and P.K. Ranjekar (Pune, India) 43–52

CELL AND TISSUE STUDIES IN VITRO

In vitro culture of *Aloe barbadensis* Mill.: morphogenetic ability and nuclear DNA content
by I.C. Sanchez, L. Natali and A. Cavallini (Merida, Mexico and Pisa, Italy) 53–59

Transgenic plants of the tropical pasture legume *Stylosanthes humilis*
by J.M. Manners (St. Lucia, Australia) 61–68

Fusion of germinating watermelon pollen tubes with liposomes
by A.E. Gad, B.-Z. Zeewi and A. Altman (Rehovot, Israel) 69–75

Lotus tenuis Wald. & Kit.: in vitro conditions for plant regeneration from protoplasts and callus of various explants
by M. Piccirilli, F. Pupilli and S. Arcioni (Perugia, Italy) 77–82

Announcements 83–84

Erratum 85

PHYSIOLOGY AND BIOCHEMISTRY

Effect of kinetin (6-furfurylaminopurine) on changes in membrane lipids in relation to growth of isolated cotyledons of vegetable marrow (*Cucurbita pepo* L.)
by Y. Paul and S. Gupta (Ludhiana, India) 87–92

Purification and characterization of 5′-nucleotidase from the Golgi apparatus of peanut cotyledons
by R. Mittal, J. Das and C.B. Sharma (Roorkee, India) 93–101

Assessment of Na^+/H^+ antiport in ATP-depleted red beet slices and barley roots
by B. Jacoby and S. Teomy (Rehovot, Israel) 103–106

Effect of seed encapsulation on the mobilization of the reserve material during germination in groundnut *Arachis hypogea* seeds
by M. Wadhwa, K. Verma, K.L. Bajaj and R. Singh (Ludhiana, India) 107–113

Cutin composition and biosynthesis during gibberellic acid-induced stem extension of *Pisum sativum* var. Meteor
by D.J. Bowen and T.J. Walton (Bristol and Swansea, U.K.) 115–127
Leaf development and senescence in *Panicum miliaceum* L., a cereal with a short seed-to-seed cycle
by J.L. Embry and E.A. Nothnagel (Riverside, CA) 129–136
Ribosomal and polyadenylated RNA content of rubber tree latex, association with sucrose level and latex pH
by J. Tupý (Abidjan, Ivory Coast) 137–144

GENETICS AND MOLECULAR BIOLOGY

Expression of lupin nodulin genes during root nodule development
by A. Konieczny, K. Szczyglowski, L. Boron, M. Przybylska and A.G. Legocki (Poznan, Poland) 145–149
Application of DNA fluorochromes for flow cytometric DNA analysis of plant protoplasts
by I. Ulrich, B. Fritz and W. Ulrich (Stuttgart, F.R.G.) 151–158

CELL AND TISSUE STUDIES IN VITRO

In vitro culture and the incidence of somaclonal variation in regenerated plants of *Trifolium pratense* L.
by H. Wang and F.B. Holl (Vancouver, Canada) 159–167
The isoperoxidase pattern changes and the pigment changes of *Pedilanthus tithymaloides* L. *variegatus* calli as a result of sucrose concentration and phytoregulator content of the culture medium and daily temperature differences
by P. Bricage (Pau, France) 169–173
An improved anther culture method for obtaining higher frequency of pollen embryoids in *Triticum aestivum* L.
by C.C. Chu and R.D. Hill (Winnipeg, Canada) 175–181
Erratum 183

PHYSIOLOGY AND BIOCHEMISTRY

Differential rates of α-amylase and acid phosphatase induction by GA_3 in embryoless half-seeds and isolated aleurones of wheat
by S. Lall, M. Berry, D. Saluja and R.C. Sachar (Delhi, India) 185–190
Changes in the activation state of rubisco in bean leaves in relation to recovery of photosynthetic activity after various treatments
by J. Farineau, A. Suzuki and J.-F. Morot-Gaudry (Versailles, France) 191–198
Orientation of the terminal pigments in the phycobilisome core of *Synechococcus* sp.
by B.-D. Hsu (Taiwan, Repubic of China) 199–203
Proteolytic activation of a lipolytic enzyme activity in potato leaves
by R.A. Moreau and C.P. Morgan (Philadelphia, PA) 205–211
The effect of supplemented media on the growth in vitro of bi- and trinucleate pollen
by G. Bergamini Mulcahy and D.L. Mulcahy (Amherst, MA) 213–216
Subcellular localization of a carboxypeptidase activity in maize root homogenates
by A. Chanson and P.-E. Pilet (Lausanne, Switzerland) 217–221
Immunocytochemical localization of the major "pathogenesis-related" (PR) protein of tomato plants
by P. Vera, J. Hernández Yago and V. Conejero (Valencia, Spain) 223–230
Long chain pentyl- and hexyl-esters and other lipoids in leaf wax of *Ilex aquifolium* L. (Aquifoliaceae)
by H.H. van Genderen, J. Jaarsma and C. Versluis (Utrecht, The Netherlands) 231–238
Substrate specificity of partially purified UDP-glucose: nuatigenin glucosyltransferase from oat leaves
by M. Kalinowska and Z.A. Wojciechowski (Warsaw, Poland) 239–245

GENETICS AND MOLECULAR BIOLOGY

A new source of cytoplasmic male sterile tobacco obtained by fusion between *Nicotiana tabacum* and X-irradiated *N. africana* protoplasts
by T. Kumashiro, T. Asahi and T. Komari (Shizuoka, Japan) 247–254

Differential effects of the Hiproly *lys 1* gene on the developmental synthesis of (lysine-rich) proteins from barley endosperm
by U. Rasmussen, M.S. Williamson, J. Mundy and M. Kreis (Valby, Denmark and Harpenden, U.K.) . 255–266

CELL AND TISSUE STUDIES IN VITRO

Embryogenic and callus-specific proteins in somatic embryogenesis of the grass, *Dactylis glomerata* L.
by G. Hahne, J.E. Mayer and H. Lörz (Köln, F.R.G.) 267–279

Subject Index Volume 55 281–284
Author Index Volume 55 285–286
Contents Volume 55 287–289
